Principle 1 – Perceivable

Information and user interface components must be presentable to users in ways they can perceive.

Guideline 1.1 – Text Alternatives

Provide text alternatives for any non-text content so that it can be changed into other forms people need, such as large print, braille, speech, symbols or simpler language.

1.1.1 Non-text Content — Level A

All non-text content that is presented to the user has a text alternative that serves the equivalent purpose, except for the situations listed below. [Show full description](#)

Understanding 1.1.1

Hide techniques and failures for 1.1.1

Sufficient

Advisory

Failures

Sufficient Techniques

Note: Other techniques may also be sufficient if they meet the success criterion. See [Understanding Techniques](#).

Situation A: If a short description can serve the same purpose and present the same information as the non-text content:

- G94: Providing short text alternative for non-text content that serves the same purpose and presents the same information as the non-text content

Short text alternative techniques for Situation A:

- ARIA6: Using aria-label to provide labels for objects
- ARIA10: Using aria-labelledby to provide a text alternative for non-text content
- G196: Using a text alternative on one item within a group of images that describes all items in the group
- H2: Combining adjacent image and text links for the same resource
- H35: Providing text alternatives on applet elements
- H37: Using alt attributes on img elements
- H53: Using the body of the object element
- H86: Providing text alternatives for ASCII art, emoticons, and leetspeak
- PDF1: Applying text alternatives to images with the Alt entry in PDF documents

[Checklist](#)

Checklist

CHECK YOUR WCAG COMPLIANCE

Content

Content is the most important part of your site.

Use plain language and avoid figures of speech, idioms, and complicated metaphors.

Make sure that `button`, `a`, and `label` element content is unique and descriptive.

Use left-aligned text for left-to-right (LTR) languages, and right-aligned text for right-to-left (RTL) languages.

Global code

Global code is code that affects your entire website or web app.

Validate your HTML.

Use a `lang` attribute on the `html` element.

Habit 2: Begin with the End in Mind

Plan and structure your content to ensure it can be navigated easily by keyboard users and assistive technologies.

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Lobortis scelerisque fermentum dui faucibus in ornare quam. Ultrices dui sapien eget mi proin sed. Ut faucibus pulvinar elementum integer. Augue interdum velit euismod in pellentesque massa placerat. Sed vulputate odio ut enim. Bibendum ut tristique et egestas quis ipsum suspendisse. Viverra aliquet eget sit amet tellus cras. Enim eu turpis egestas pretium.

Proper Heading Structure

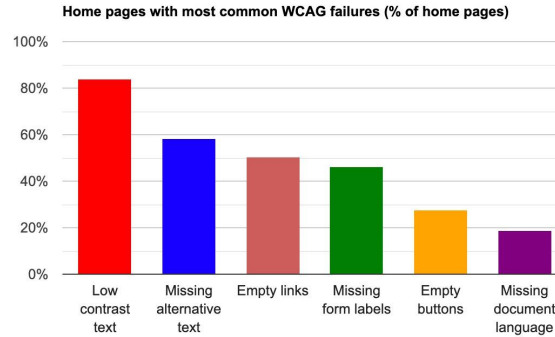

Sed lectus vestibulum mattis ullamcorper velit sed ullamcorper. Ullamcorper a lacus vestibulum sed arcu non. Ultricies integer quis auctor elit sed vulputate mi sit amet. Commodó quis imperdiet massa tincidunt nunc pulvinar sapien. Eu lobortis elementum nibh tellus molestie nunc. Vel turpis nunc eget lorem dolor sed viverra ipsum. Praesent semper feugiat nibh sed pulvinar proin. Feugiat nibh sed pulvinar proin gravida.

Use Bullets and Numbered List When you List Something

Ullamcorper a lacus vestibulum sed arcu non. Ultricies integer quis auctor elit sed vulputate mi sit amet.

Habit 3: Put First Things First

Address the low-hanging accessibility fruit first.

Home pages with most common WCAG 2 failures

WCAG Failure Type	% of home pages in 2023	% of home pages in 2022	% of home pages in 2021	% of home pages in 2020	% of home pages in 2019
Low contrast text	83.6%	83.9%	86.4%	86.3%	85.3%
Missing alternative text for images	58.2%	55.4%	60.6%	66.0%	68.0%
Empty links	50.1%	49.7%	51.3%	59.9%	58.1%
Missing form input labels	45.9%	46.1%	54.4%	53.8%	52.8%
Empty buttons	27.5%	27.2%	26.9%	28.7%	25.0%
Missing document language	18.6%	22.3%	28.9%	28.0%	33.1%

96.1% of all errors detected fall into these six categories. These most common errors have been the same for the last 5 years. **Addressing just these few types of issues would significantly improve accessibility across the web.**

Then there was COP26. Though dismissed (not entirely

The screenshot shows a website interface with a red box highlighting a specific area. Inside the red box, a white tooltip with a blue border displays the text "Empty link" in blue, followed by "A link contains no text." Below this text are two options: "REFERENCE" and "CODE" in green. A red arrow points from the top right towards the tooltip. Another red arrow points from the bottom right towards a broken link icon in the footer. The website header includes a blue navigation bar with "Sections" and "Support Pos" visible. Below the header is a blue banner for "Positive News magazine". The footer contains a "Log In" link, a search icon, and several broken link icons (red squares with a white 'S' and a small 'x'). A purple shield icon with a white 'x' is also visible in the footer. The text "*Good news*" and "ewables had a record year" is partially visible at the bottom left.

Even as the pandemic rumbled on and the climate crisis intensified, there was much progress to report on. Here are the big good news stories of 2021

I. There was a report on what's become a performance Task Manager in January. It was a report on what's become a performance Task Manager in January. It was a report on what's become a performance Task Manager in January.

Then there was COP26. Though dismissed (not entirely unfairly) by Greta Thunberg as a load of "blah, blah, blah", the climate summit offered signs of progress that can't just be written off as greenwash. It didn't go far enough, but

Even as the pandemic rumbled on and the climate crisis intensified, there was much progress to report on. Here are the big good news stories of 2021

I. There was hope for stabilising the climate

It was a massive year for the climate, and reminders about what's at stake came thick and fast: [the IPCC's 'code red' report](#), Siberian wildfires, heat domes, floods. Alarm bells became deafening, but there were beacons of hope, too.

In January, the US - the world's second largest emitter after China - [rejoined the Paris agreement](#), injecting fresh urgency into the climate conversation.

Then there was COP26. Though dismissed (not entirely unfairly) by Greta Thunberg as a load of "blah, blah, blah", the climate summit offered [signs of progress that can't just be written off as greenwash](#). It didn't go far enough, but
